

Specs

Write a program that prints the lyrics of the song [99 Bottles of Beer](#).

It will take as an argument the starting number of bottles. If the provided argument is 5, this program should work this way:

```
5 bottles of beer on the wall, 5 bottles of beer!  
Take one down, pass it around, 4 bottles of beer on the wall!  
4 bottles of beer on the wall, 4 bottles of beer!  
Take one down, pass it around, 3 bottles of beer on the wall!  
3 bottles of beer on the wall, 3 bottles of beer!  
Take one down, pass it around, 2 bottles of beer on the wall!  
2 bottles of beer on the wall, 2 bottles of beer!  
Take one down, pass it around, 1 bottle of beer on the wall!  
1 bottle of beer on the wall, 1 bottle of beer!  
Take one down, pass it around, no more bottles of beer on the wall!
```

Hint

- I hope you noticed the change from bottles to bottle when only 1 bottle remains !
- If you want a line break inside a string, you can use the `"\n"` character. It stands for new line.
